## Okuma guide select pro trout spinning rod

I bought the Okuma GSP-S-802L and I can say they did well. The tip is very sensitive and sensitive, the rod has a large spine for the large tortilla. I throw 1/32 oz jigs for river trout so I chose the 8ft model. Along with Shimano 1000 class coils this rock rod. You get a lot of features that are at a much higher price on this rod for Okuma. Order Chart#HookedOnTDReviewsQ&AShipping & Returns Okuma Guide Select Pro Trout Spinning Rod Features: UFR-II: 30/40-ton fiber reinforced rod tip unidirectional technology, ultrasensitive premium fore carbon rod gaps and rear cuffs The same specifications that Guide Select Pro vas Fore grips are customized with EVA and rubber cork inlays No questions or answers for this item. Limited Manufacturing Life Warranty Information for Custom Field Product Products Write review 5 Posted by Marc Goyan on October 2, 2020 First Day Out of the Box. Amazing! Not only did he land the largest Chinook River ever, more than 22 pounds. He did it easily. I thought maybe I was under rodding when I bought it. No doubt now. I've stuck with fish that don't heard before. I was out fishing everyone there 5 to 1. This is a very sensitive rod, but it has a strong spine with tons ... and I mean tons of reserve power to get into the beach. I'm going to buy more rods from that line. Thanks Tackle Haven!!! 5 5 by Jason Wagner on March 4, 2020 Don't Be Disappointed
